**Project Scope**

- 1,500 buses - Automated Fare Collection system(AFC)

**Overview**

LECIP provides a complete AFC solution to Toei Bus, including fareboxes and a back-end system. The project includes 1,500 buses operating in Tokyo and serving approximately 58,000 people daily.

Our products perform multiple functions accurately and quickly with high security. The fareboxes operate by the touch screen controllers for the drivers. They accept cash, contactless smart cards and magnetic cards for payment.
